

Waste paper (simple language)

Englisch

The blue bin is for waste paper, card and cardboard.

Waste paper, card and cardboard can be reused. Old paper is turned into new paper. New boxes are made from card and cardboard. This saves wood, water and power. If you do not want a blue bin, you can also take waste paper and card/cardboard to a recycling facility yourself and put it in separate containers.

What goes in the blue bin?

For example:

- » Newspapers
- » Card and cardboard
- » Catalogues and brochures
- » Booklets and books
- » Letters / envelopes
- » Paper bags
- » Cardboard rolls from toilet paper and kitchen roll.

Things to remember:

- » The blue bin is voluntary and there is no extra charge.
- » The blue bin has a 240 l capacity and is emptied every 4 weeks.
- » Put your bin out at the edge of the pavement by 6.00 a.m. on collection day.
- » The collection dates are shown in the waste calendar (paper version), online or in the waste app.
